Orascom Construction PLC   *Cairo, Egypt*

Software Quality Assurance Engineer (Internship)   Jul 2018 - Sep 2018
4S Technologies   *Cairo, Egypt*

FREELANCE PROJECTS

CDIS Egypt 2024 Website

1. Executed the Frontend development of the entire website, and applied the UI design provided by the client with pixel-perfect precision

2. Gathered requirements from the client, and translated them into technical tasks

3. Implemented tasks independently or collaborated with the Backend Engineer, whom I personally hired, for execution

4. Managed the CDIS domain throughout the project lifecycle, and established a testing subdomain for client User Acceptance Testing (UAT) prior to the website going live

5. Personally recruited and hired the backend engineer for the project, and collaborated with them to ensure seamless integration of Frontend and Backend components

6. Handled deployment to Amazon Web Services (AWS), while ensuring seamless migration of existing DNS records, particularly safeguarding active email functionality
